

We recently had a two storey home built at Port Noarlunga for owner occupation. My wife designed the home, which therefore became a Custom build project. We chose Paul Stone of South Building Inspections to project manage the build in conjunction with ourselves as owner builders.

From the first initial meeting with Paul, we found him to be extremely knowledgeable of the building industry, straight to the point, honest and very easy to get along with. And this continued throughout the entire construction phase, which made the build process less stressful for ourselves.

Paul has been involved in the building industry for 51 years and began his trade in the UK. He emigrated to Australia 15 years ago and it was this combined knowledge and experience of building in UK, Europe and Australia that we found invaluable during construction of our home.

We regularly implemented Paul's suggestions and recommendations and that led to our gaining a far more superior and quality finish. For example;

- We chose double glaze windows throughout
- We chose top end/best rated insulation
- Polystyrene walling rather than brick

These choices have created an extremely efficient and effective insulated home for both cooling and heating.

Coincidentally, a house was being built two properties away from ours during the same period of construction as ours. Without naming the other builder, it enabled us to witness and compare first hand the superior quality and finish in numerous aspects of our home when compared to the other.

Over the 15 years Paul has been building in Australia, he has continually used the same trades for each phase of construction therefore maximising on their proven and reliable outcome.

Our home was constructed in approximately seven months from start to finish and we have been residing in it for about ten months.

We are very proud of our new home and have received regular praise from family, friends and passers by.

We would not hesitate to recommend Paul Stone as a Builder of proven quality and high end finish of a home.
